

Lanced-Face T-Bar Filter Grille

Model 1280

Face is constructed of steel for unsurpassed strength and durability

Universal frame design allows the removable face to be installed in any direction quickly and easily

Attractive flush face design is precision engineered with extended margins and swing style latches allow easy access to the filter

Lanced-face design with 1/3" blade spacing allows for great airflow while concealing the filter

The new J&J Register model 1280 lanced filter grille is a great addition to the T-bar family. With durable, steel construction and a versatile design the model 1280 is a value that deserves a closer look. The removable face is easily detached from the frame and can be installed in any direction with its no-tools hinge lock design. Swing style latches allow easy access to the filter while maintaining a clean flush design that is sure to look great.

DON'T FORGET ABOUT THE BACK!

The model 1280 filter frame T-bar does not stop at an impressive face, J&J Register has also brought to the counter a quality back. The overlapping edges provide the frame with its rigid strength while keeping it light and easy to work with. The frame securely holds a 1" filter with built in filter retainers allowing the contractor to easily insert any standard filter.

Built in filter retainers hold the filter securely in place

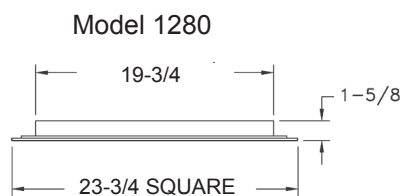

Model 1280

Frame is light and easy to install; even in ceilings

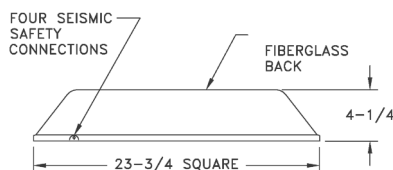

Holds standard 1" disposable filters (not included)

Stamped steel overlapping edges add strength and durability

Available with R4 (1280R4) and R6 (1280R6) insulated backs

Model 1280R4/1280R6
